

MAPPING A WICKED PROBLEM

FOOD INSECURITY IN PITTSBURGH

TEAM AUTOPOIESIS

Lorin Anderberg, Diane Hu, Alisha Saxena, Shama Patwardhan

Infrastructure/Technology/Science Issues are concerned with how our societal systems (Material structures + the rules that govern them), technologies and science are connected to/cause/exacerbate the problem

Social Issues are about how we think and what we do relative to the problem: attitudes, beliefs, cultural norms, practices, behaviors, etc

Environmental Issues are concerned with how the problem affects the natural environments and members of the ecosystem (its not about people)

Economic/Business Issues are concerned with our business and economic paradigms and how they have contributed to the problem and/or are affected

Political/ Governance/ Legal Issues are concerned with laws, policies and legal issues that are connected to the problem and/or exacerbate it

GLOBALIZATION

COVID-19
